EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jennifer Fisher, speaking for Kevin Daffer on 7-30-08.

The application has been amended as follows:

In claim 1, replace "A system for graphical display" with -- A system stored on a computer-readable storage medium for graphical display --

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The examiner considered the Decision on Appeal rendered March 31, 2008 and after updated search, no other prior art of record has taught that which was presented in the claims.
3. Therefore, claims 1-17 are allowable.
4. Independent claims 1, 9, and 17 when considered as a whole, are allowable over the prior art of record (IS-SUN (Introducing Swing) and M-SUN (Mixing Heavy and Light Components)). IS-SUN teaches a system for the graphical display of an object created by an application program running under an operating system (see page 1, paragraph 1), and a graphics resource component adapted to display the object independently of the operating system (see

Art Unit: 2173

page 1, paragraph 5). IS-SUN is supplemented by M-SUN which further teaches a method of implementing swing components similar to that of IS-SUN, but further teaches a Swing class that associates an object with a graphics resource component, and further displays the object, (see page 2, paragraph 2), and an ancestor component, adapted to receive events pertaining to the object and route the events to the Swing component (see page 2, paragraph 2). However, specifically the prior art of record fails to clearly teach or support the limitations of *a peer component, adapted to receive events pertaining to the object and route the events to the proxy component, which associates the object with the graphics resource component and invokes methods of the graphics resource component to display the object*, as stated by the Board of Patent Appeals and Interferences, in the decision mailed 3-31-2008.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
